

CERTIFICATE IN SUSTAINABLE ENTERPRISE

The Certificate in Sustainable Enterprise focuses on the theory and practice of environmental and social sustainability in the business environment, including the intersection of sustainability and innovation in managing a business, strategies and tools of the emerging field of industrial ecology, and an introduction to the rapidly growing field of social entrepreneurship.

Several certificate programs are offered in public administration. These programs provide students with a post-baccalaureate knowledge of an area of specialization in public administration. Students in these programs register as certificate students.

Certificate programs require a set of four courses. Students who are admitted to a master's degree program may apply coursework previously taken in a certificate program toward the requirements for the master's degree.

This certificate is designed for professionals who want to increase their knowledge and skills in security, safety, and risk management but do not currently have the time to pursue a Master of Public Policy & Administration degree.
